

CALL FOR PAPERS
IEEE SYSTEMS JOURNAL
<http://systemsjournal.org>

Editor-in-Chief: Professor Mo Jamshidi
moj@wacong.org, mo.jamshidi@utsa.edu

IEEE Technical Activity Board has approved Systems Council to build systems application focused synergy among 15 IEEE Societies who have formed this Council.

SCOPE: This journal is created to provide a systems-level focused forum for application-oriented manuscripts that address complex systems and system-of-systems of national and global significance. It is intended to encourage and facilitate cooperation and interaction among IEEE societies, and other professional societies, with systems-level and systems engineering interest.

Journal Need: The journal is intended to stimulate awareness, appreciation and utilization of systems thinking and the supporting systems engineering disciplines. Themes that will be addressed include complexity, integration, interoperability, dynamics, communication, effectiveness, ethics and completeness. This publication fills a void un-addressed by most other journals, both within IEEE and outside. Within the scope of this journal, areas of interest include, but are not limited to: Energy, Management, Disaster response, Space exploration, Manufacturing, Automation, Communication, Information and Computer Technologies including Cyberspace, Internet, Distributed Networks, Transportation, Environment including Earth Sciences, Socio-economic, Agricultural, Biological, Medical, Services, Educational Systems, Global warming, Ozone Layer issues, Safety concerns and systems engineering related topics to the System-of-Systems environment.

This journal intends to publish a number of special issues on key topics impacting the Globe or regional locations of the Globe as well as joint issues with Council member Societies' publications in an effort to target professionals from industry who may not yet addressed by the IEEE, in the desire to increase IEEE membership from these ranks. These Special Issues and Joint Issues would cut across the societies technical profiles and spreads industrial application-focused systems thinking, which is the primary reason for creating the Systems Council to a wave of a new audience.

Submit your electronic paper (Acrobat pdf format) in standard IEEE format (double column, font 12 Times Roman, keywords, corresponding author, etc.). We currently accept papers only in Adobe Acrobat PDF file format.

PAGE CHARGE - Effective January 1, 2009 IEEE Systems Journal will implement a page limit policy. Each paper is limited to a maximum of 10 pages of the journal. Up to 8 final pages will be complementary and the 2 allowable extra pages will cost \$150 per page. This payment will come with your proofs when your paper is in press. This policy will give a chance to many more authors around the world to contribute to ISJ.
